THE BEST COFFEE ON EARTH

Ross Wins Calgary By-Election

W. Harry Ross, Liberal was
elected at the by-election held in
Calgary on Monday to fill the vacan-
cy in the Alberta Legislature
caused by the death of the late
George H. Webster. Mr. Ross' final
vote was 10,968, while Miss Anna
Turner, C.C.F.-C.I.P. candi-
date, was second with a total vote
of 9,065.

"The Path Across The Hill" Tuesday, January 23rd.

This popular comedy-drama that
played to a packed house here on
Jan. 5, will be repeated in the U.
F. A. hall on Tuesday, January 23.
Tickets are now being sold and it
is evident that another large audi-
ence will turn out to this home
talent play that went over the top.

Gets Nine Months Sentence For Breaking and Entering

Constable R. C. Fenn, R.C.M.P.,
did a splendid piece of work about
5 a.m. Tuesday morning when he
discovered that Halliday & Laut's
store had been broken into, he im-
mediately phoned Police Depart-
ments in Calgary, Olds, Innisfail
and Irricana, so that police in all
directions were watching for the
culprits, with the result that when
Joseph Le Blanc arrived at about
the city limits, Calgary, the police
picked him up with practically all
the goods, amounting to about
\$400.00.

Le Blanc appeared before Magis-
trate Scott in police court, Cal-
gary, Wednesday, where he faced
a charge of breaking and entering,
and drew a term in goal of nine
months hard labor.

"Footlight Frolics"

"Footlight Frolics" a musical
review, presented by the Calgary
Elks Dramatic Club in the U.F.A.
hall on Wednesday, under the aus-
pices of the Anglican Church, was
greeted by a large audience.

Tommy Hanna, singing com-
edian, and Stewart Currie, writer
and director of the play, were the
featured players, and were ably
assisted by a clever chorus of girls.
The magician made a hit with his
feats oflegerdemain.

Annual Bouspiel

The Crossfield Bouspiel to be held
on February 5 and 6, promises to
have a very attractive prize list,
judging by the many donations
and valuable prizes already secured
by secretary Austin Whilliams.

Rinks are expected from Dids-
bury, Carstairs, Airdrie, and at
least one rink from the district
west of town.

Annual Meeting Board of Trade January 25

The annual meeting of the Board
of Trade will be held in the Oliver
Cafe on Thursday evening, Jan.
25th at 6.45.

Crossfield School Hockey Team Join Rosebud Hockey League

The Crossfield High School
Hockey Team have entered the
Rosebud Inter-School Hockey
League with Carstairs, Innisfail,
Bowden and Didsbury.

Crossfield will play at Bowden
Jan. 24, and the first home game
will be with Innisfail on Friday,
January 26 at 8 p.m.

The twenty-sixth annual conven-
tion of the United Farmers of Al-
berta opened in Edmonton on Tues-
day morning. Robt. Gardiner was
re-elected President at Wednes-
day's session.

Mrs. G. Y. McLean and daughter
Audrey, returned on Wednesday
from Hanna, where they have been
visiting friends during the past
three weeks.

Don't forget the tea and sale of
home cooking on Saturday.

OLD TIMERS TO CELEBRATE WEDNESDAY, JANUARY 31

The Old Timers' round-up to be
held in the U. F. A. hall on Wed-
nesday, January 31, promises to be bigger
and better than ever judging
by the work of the committees
at this time.

The dance committees have been
successful in securing The Foothill
Billies Orchestra—the outstanding
old time dance orchestra of Wes-
tern Canada. Mrs. Trainor is the
pianist in this well-known radio
orchestra, and she needs no intro-
duction to the people of this com-
munity. They are also bringing
with them their own floor manager
who created such a favorable im-
pression at the East Community
hall in the early part of the winter.

The hall committee have again
contracted with George Lem of
the Oliver Cafe to do the catering
for the banquet and midnight lunch.
George's ability to handle a large
crowd, and give them real service,
is well known, and the inner man
will be well looked after.

Win. Laut and R. M. McLeod
who are arranging the entertain-
ment part of the program, promise
something different and better than
ever.

Old timers who have resided in
Alberta previous to Dec. 31, 1907,
are eligible for membership in the
Crossfield and District Old Timers'
Association.

Crossfield Athletic Club Organized

A meeting was held in the Oliver
Cafe at 8 o'clock Monday night
Jan. 15th to consider the idea of
forming a Physical Culture and
Gymnastic Club for the young men
of Crossfield and district. 26
were present and a club was formed
under the name of the Crossfield
Athletic Club. Const. R. C. Fenn
who has gone to quite a little
trouble to get this proposition un-
der way, is the Director and In-
structor. Les Spivey was appoint-
ed Secretary-Treasurer. An execu-
tive committee of four was appoint-
ed consisting of Evan Gordon, Fred
Haywood, Hugh McFadyen, and
Luke Wallace.

The membership fee was set at
fifty cents per annum. There are
about thirty members to date, with
the possibility of several more join-
ing within the next few days.

There is no doubt whatever that
this will be a success. Already
several of the business men have
been kind enough to give the club
a real help.

The first regular meeting of the
Crossfield Athletic Club was held
Tuesday night last, and about 26
members were present. Const. Fenn
put them through their drill and
exercise paces in great style. If the
puffing and groaning is any bar-
ometer of the after effects, it is ap-
parent that the younger generation
will be somewhat stiff for the next
few days.

The meeting however was enjoyed
by all present and anyone in-
terested is invited to join up.
Membership tickets may be had
from Const. Fenn or Les Spivey.

Meetings will be held in the U.
F. A. hall on Tuesday and Thurs-
day of each week at 7.30 p.m.

The annual dance and entertain-
ment of the Native Sons & Daugh-
ters Association of Crossfield will
be held in the U.F.A. hall on Fri-
day, February 9th.

The Chronicle would be pleased
to receive reports of the annual
school meetings of the surrounding
rural school districts, such as list
of new officers, etc. Secretaries are
invited to mail or hand in same to
the office.

Paul Allan of Airdrie sold a Ford
car to R. J. Laut of Crossfield, and
a Chevrolet coupe to E. Volden of
Madden, during the past week.

Experiments Being Carried Out By United States Railways With Aerodynamic Trains

The experiments being conducted by United States railways with aerodynamic types of trains which will flash over the rails between New York and Los Angeles in 90 hours at an average speed of 85 miles an hour are being carefully watched by Canadian railway officials.

While opinions as to the feasibility of the new trains operating in Canada are divided, Canadian motive engineers are eagerly awaiting the results of the experiments although they point out that any development in this direction will have to wait for better times.

From the Canadian viewpoint a serious problem is presented in the all-metal construction of the trains which motive men say will likely prove to be a conductor of the better Canadian cold. Frost works its way through steel structures and unless backed by heavy insulation the all-steel cars would be impractical in Canada where steel, heavy insulation and wood are utilized in the making of railway coaches.

Engineers viewing the experiments in a favorable light point out the new type of trains will permit lower operating costs in addition to increased speed, comfort and luxury.

On the other hand some motive men take the view the large increase in speed will mean a decrease in safety. At present some Canadian trains average between 50 and 55 miles an hour but to achieve this speed they have to travel at 80 miles an hour on occasions. The new trains to maintain an average of 85 miles an hour would have to touch 110 miles per hour or more—a heavy burden on the present type of road-bed which is expected to be used.

The roadbed is one of the contentious points of the contrasting points of view. Opponents say the present roadbed would not be able to stand the strain of the high speed and a special rigid type would be needed—the cost of replacement being tremendous.

To give weight to their argument they cite the case of the "Flying Hamburger" which developed a speed of 100 miles an hour in Germany. The company which introduced the stream-line car is now completing a special track.

High costs in initial building of the trains through the use of duralumin and stainless steel in addition to the holding up of other trains to permit the "comet" train to clear track are other reasons against the new trains. Low operating costs, possible future reduction in materials and passenger appeal might possibly offset these facts.

However, some of the engineers are of the opinion that if special roadbeds were constructed and sufficient safety achieved, there was no reason why the experiments should not be successful.

In any event they declare if the public desires the new types of trains, the near future will see them speeding across continents in two days and two nights.

Good Sugar Beet Yield

Satisfactory Crop Grown On Northern Alberta Irrigated Land

Lethbridge Northern Irrigation District leads all other Southern Alberta sections in 1933 sugar beet yields. Indications are that this district will show an average yield of better than 11 tons per acre. Turin so far stands at the top with almost 12 tons, while Iron Springs is second with 11.38 tons. These tonnages are far ahead of the Taber-Barrow district which, up to this year, has always held the high yield record.

Rose Bush Surprises Owner
Mrs. Wilson Minahall, of Georgetown, British Columbia, thinks her rose-bush has some explaining to do. For the years previous the rosebush faithfully produced an abundant crop of white roses. One morning Mrs. Minahall was surprised to find a single red rose isolated in the nest of white flowers. The original tree from which Mrs. Minahall's bush was "slipped" still bears the white roses.

A Valuable Manuscript

Francis Scott Key's original manuscript of "The Star Spangled Banner" was sold at public auction recently for \$24,000. The buyer was Dr. A. W. Henschel, noted bibliophile. The manuscript is on a sheet of ordinary notepaper, the ink being with age.

W 14 31 2020

Praise For Modern Girl

Lord Duncannon Believes They Are More Prepared To Meet Demands Of Our Day

Modern girls received praise from Lord Duncannon, son of Earl Bessborough, Governor-General, who visited Montreal with the Ottawa Drama League playing the part of Romeo in their production of "Romeo and Juliet," when he was asked in an interview if he did not think the fainting lady of the crinoline more fascinating.

The interviewer, "Molly," of the Montreal Herald, quotes him as saying, "I like the new fashioned girls far better—because they are smarter—and far more prepared to meet the demands of our days."

"His young lordship said he likes Canada and does not come out merely because his parents happen to be here. 'I could stay at Cambridge if I really didn't want to come. I love Canada and I hope to visit here a lot later on. Of course I am going to have my coming-of-age party in Ottawa this summer, and that is really the best thing I have to look forward to.'"

He said the stage was only his hobby. He did not wish to make it his career. He was quite definite about becoming a politician though he said he was going in for business first.

By Ruth Rogers

530

NEW SLEEVE INTEREST IN SIM-
PLE FROCK—ADAPTS ITSELF
ADMIRABLY TO ALL-DAY
WEAR

Sleeves that give weight to the shoulders are very important this season. It shoulders it charmingly in this model. Don't you think? The slim-line skirt has inverted plaits to give freedom to the hem.

This adorable frock can be carried out in faillie crepe silk, crepe satin, wool crepe, silk and synthetic crepe or wool and synthetic mixtures.

It's stunning as pictured in eal-gray faillie crepe.

Style No. 530 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Hedges And Evaporation

Interesting Results Proved Through Observations At Swift Current

A caragana hedge proved effective in checking evaporation, but its influence did not extend beyond a distance of 75 feet, according to observations made at the Dominion Experimental Station, Swift Current, Sask., during the past season.

Weather factors which cause evaporation of water from the soil also stimulates the dissipation of water by crops. Checking evaporation of water from the soil, therefore, means more water for crops and checking excessive evaporation from plants, usually termed transpiration, will accomplish the same objective. Experiments have shown that 27 per cent. more water was used in the protection of each bushel of wheat from land where evaporation of water was allowed to proceed over than from land where evaporation was checked.

Earlier observation showed that a caragana hedge was effective as a windbreak to a distance of 50 feet for each foot in height of the hedge. Wind is the most potent factor in causing evaporation on the prairies, but is very fickle in its direction. In the Swift Current observations on evaporation, the hedge is five and a half feet high and lies in a north and south direction. At times the influence of the hedge in checking evaporation was unmistakable, but on other occasions, according to change in wind direction, it proved quite ineffective.

Champion Woman Wrestler

Cannot Find Anyone To Challenge Her Supremacy

Miss Emeline is travelling all over Turkey looking for someone who will wrestle with her. She is the champion wrestler of Turkey, and weighs nearly 400 lbs. For the last year no one has cared to challenge her supremacy. She is, therefore, forced to earn her living by displays of strength. She will support a sack of wheat weighing fifty pounds on her body, with four men standing on the sack; or she will hold an iron bar between her teeth and invite two men to bend it.

Flivver 'Planes

Low Price Aeroplanes To Be Turned Out On Mass Production Basis

The \$700 flivver aeroplane—long a dream of the aviation world—has zoomed close to the realm of actuality.

Twenty-two leading manufacturers of planes, after a long discussion at the Aeronautical Chamber of Commerce, New York, announced they had decided to support a proposal of Eugene V. Vidal, director of aeronautics of the Department of Commerce, to develop such a low-priced plane, to be turned out on a mass production basis.

Affable Passenger: "Your husband's a poor sailor, I believe?"
Imposing Ditch: "Indeed he's not—he's a rich produce merchant."

A common pigweed plant may yield as many as 117,000 seeds.

One Of Strangest Lakes

Possible To Walk On Body Of Pitch In Trinidad

Lake La Brea, in Trinidad, is one of the strangest lakes in the world. In legend there are lakes with no beds, mired lakes into which rivers flow without mixing waters, and lakes that vanish in a night and reappear as quickly, but Lake La Brea is remarkable in that it is possible to walk upon it.

It is a lake of pitch occupying the crater of an old volcano. Vast quantities of bitumen are exported every year for use in road-making, yet the lake shows no signs of drying up. Fresh deposits are continually forming on the bed of the lake at a depth of about 130 feet.

It is considered to be one of the hottest places in the world, yet the bitumen forming the lake is sufficiently hard to allow of driving a horse and cart across it.

The lake has an area of some hundred acres, and is estimated to contain more than nine million tons of bitumen.

Seed Wheat For Russia

Sixteen Thousand Bushels Of Garnet Wheat Goes To Siberia

Sixteen thousand bushels of seed wheat, chiefly Garnet, will leave Saskatchewan for Siberia, bought by the Soviet government for the districts needing an early wheat, according to information received from Neil Stewart, Dunblair, president of the Saskatchewan Registered Seed Growers Association. Farmers selling the seed have received a satisfactory premium over commercial prices.

Mr. Stewart said the association could have handled a larger order, but field inspected seed was not available.

Grain which is now stored in the Registered Seed elevator at Moose Jaw has been cleaned there and will go for February delivery at New York.

Some of the wheat was grown in Alberta.

Retaining Winter Moisture

Wheat Yield On Such Land Shows Big Increase

The Dominion Experimental Station at Swift Current has been experimenting with yields of wheat on land where winter moisture has been prevented from running off, and has found an increase of 42 per cent. in some cases where the water was retained, compared with similarly treated land lying the same, and in the same state of cultivation, where the water was allowed to run off.

A Real Family Job

Loosely Row sub-station near Princess Raborough, England, has been in charge of the same family for 93 years. The sub-postmaster has a license, granted in 1840, "to vend and deal in stamps in pursuance of an act passed in the fourth year of the reign of his late Majesty King William the Fourth, instituted an act to prevent the selling and uttering of forged stamps, and to allow a drawback on the exportation of gold and silver plate manufactured in Ireland."

Scheme For Furtherance Of World Peace Is Advanced By A Toronto Resident

Proving Huge Success

Speaking Clock In Paris Brings In Huge Revenue

The recently installed "speaking clock" of the Paris telephone system is proving a huge success, the Ministry of Posts has announced. Every day it tells the time to an average of eleven thousand inquirers, incidentally bringing in a revenue of four million francs yearly, half of which goes to the State.

This robot clock can tell the time to thirty persons simultaneously. On Sundays and holidays the average drops to "Odeon 94-00," states the New York Times Correspondent. Three strips of film, equipped with sound tracks, one each for the hour, minute and second, are used. The strips are wound about a drum, which is driven by an electric motor controlled by a pendulum clock. A light, falling on the paper-wound drum, is reflected to a photoelectric cell which converts the varying bright and dark lines into electric impulses. The cell is connected with amplifiers and three loudspeakers, one of which announces the hour and other the minute and the third the second, always in the proper order.

When no one is calling the clock does not "talk." Everything is turned off until a telephone call comes, when the mechanism starts instantly to work.

Bricks In Color

Multi-Colored Rough Texture Bricks Coming Into Use

Recent developments tend towards the use of multi-colored rough texture bricks, with coloring that is more pleasing to the eye and gives the appearance of charming designs without the newness that was so obvious in the old methods of construction. Such colors as Autumn Tints, Cherry Red, Brindbill, Dark Strawberry, Orange, Silver Grey and Golden Grey, will be found among the new bricks. The same applies to tiles, where at least ten different colors are now available.

Prefers Human Beings

A novel case of a lion which shuns the company of other lions, but loves to be around human beings, is reported by zoo attendants at Portland, Oregon. Although as large as the females, the big male lion cringes and cowers when the females are put in the same cage with him. He drops his haughty and becomes the masterful King of the jungles when his keeper comes in the cage.

A reputed shortage in oak trees may be the result of their use for the manufacture of antique furniture.

A scheme for the furtherance of world peace has been advanced by a Toronto author, W. H. Dyer. The proposal, still in the early stages, is to develop a flag with the word "peace" emblazoned in deep blue letters on a white oval, representing the universe, and placed on a sky blue background. The finished product would be known as the "World Peace Flag."

It is intended by the author to have the word translated into various languages and send prints to their respective countries. Already the word has been placed on ten different prizes, English covering the British Empire and the United States, German, Russian, Greek, French, Italian, Chinese, Hebrew and Esperanto, the international language.

When the proposal has become concrete, it is intended by the designer to have the peace flag submitted to the League of Nations for official recognition, and it has been stated the League of Nations symbol in Canada is willing to consider the scheme when it is placed in their hands for discussion before submission to Geneva.

However Mr. Dyer does not believe his scheme has advanced to the stage for such action, and is endeavouring to have the world peace flag in as many languages as possible before taking a step in that direction.

The finale of the scheme, after it has gained recognition, is to place the flags in the school rooms of the world so the meaning of "peace" may be impressed into the minds of future generations. Accompanying the flag is a five verse song, termed "The Children's Song of Peace."

When the scheme would gain maturity, Mr. Dyer has not stated. But he believes the next few months would see the proposal advanced much further.

Appeals To King George

Private Wanted Help To Get Out Of

Private Sam Lee, of the 2nd Battalion of the Northamptonshire Regiment was troubled. The army did not agree with him and he was anxious to get out of it, but he did not know what steps to take. He did not rely on the obvious method of approaching his commanding officer.

Then a bright idea dawned on him. He would write to the King, asking him to grant his discharge on what the army calls compassionate grounds. He spent a considerable time composing the letter. He consulted a book on etiquette and finally mailed his petition. For several days he waited hopefully; then one morning the C.O. sent for him.

"It wasn't long till Private Sam Lee was on the high seas, but he no longer belonged to the 2nd Battalion of the Northamptonshire Regiment. He was on his way to join the 1st Battalion in India."

His letter to the King reached its destination, but His Majesty necessarily had to refer it to Private Lee's C.O. and the C.O., after policy but firmly pointing out that privates are not allowed to write to the King, gave him some good advice, which, on reflection, he thankfully accepted.

Language Of The Bees

Insects Employ Kind Of Dumb And Dumb Alphabet

Bees have a language of their own, according to Mrs. L. Illingworth of Hertfordshire, England. She told the Beekeepers' Convention at Cheltenham that the buzzers employed a kind of deaf and dumb alphabet. A bee that found an abundant source of honey returned to the hive, and by dancing to his brothers and sisters informed the rest of the colony of his discovery. If they failed to follow him, he opened a secret gland on his back and wafted the perfume so that they might follow him.

Silver Currency

A proposal that silver as well as gold should be used as a basis for Canadian currency will be discussed at the coming session of parliament. The question will be introduced in the House of Commons by Thomas Reid (Lib., New Westminster), who has also a resolution on the remonetization of silver.

A cheese, 10 feet across and encased in wood, from Thill, East Prussia, was rolled through the streets in a recent "Buy German" parade in Berlin.

SAVANT'S DEATH RECALLS KING TUT'S CURSE

CARNARVON AT ENTRANCE TO TUTANKHAMUN'S TOMB

The mysterious death of Dr. Arthur E. P. B. Weigall, noted author and Egyptologist in London, recalls the series of misfortunes that overtook many who were connected with the expedition which opened the tomb of King Tutankhamun at Luxor, Egypt, more than a decade ago. Superstitious Britons say the savant's death is proof that the curse, placed by the ancient Pharaoh on his tomb, was still in progress. Lord Carnarvon, financial backer of the expedition, died mysteriously soon after Howard Carter, leader of the expedition, was stricken, but recovered. The Hon. Reginald Wendell, Carnarvon's brother-in-law, died at the age of 29, and Lady Carnarvon was afflicted with a mysterious malady but recovered. Colonel Audrey Herbert, Carnarvon's half-brother, died, and many others whose connection with the nobility was remote, also suffered through the strange spell.

WORLD HAPPENINGS BRIEFLY TOLD

The Turkish cabinet has definitely approved the new five-year plan to industrialise formerly agricultural Turkey.

The discovery of two new, small planets between Mars and Jupiter was announced by the Algiers Observatory.

Dr. Lachlan Gilchrist, professor of physics at the University of Toronto, was elected president of the Royal Astronomical Society of Canada at the society's annual meeting.

Two carloads of elk have been shipped from Wainwright, Alberta, Banff, Ont. This follows a similar shipment nine months ago to the Ontario Department of Game and Fisheries.

Efforts will be made by the agricultural committee of the Ontario legislature to bring about an inquiry by the Dominion and provincial governments into the operation of stockyards in Canada.

A new world's land plane speed record for a 1,000-kilometre (approximately 622 miles) course was set by the French pilot, M. Massotte, who flew it in two hours, 47 minutes, 31 seconds.

Canada was officially invited to participate in the next Olympic games at Berlin. The invitation was received by James G. Merrick, of Toronto, member of the International Olympic Committee, for presentation to the Canadian Olympic Committee.

The University of Montreal which has been in financial difficulties for several years, is the recipient of a gift of \$100,000 from P. V. Rougier, Parisian manufacturer. The sum is to be devoted chiefly to the medical laboratories of the university.

The winter of 1933-34 is considered by aviation companies to be the worst they have had since 'planes started operating in the northland, according to Pilot Walter Gilbert, Canadian Airways. Through heavy fogs, 'planes had to stay idle while there was plenty of work for them to do.

The Wheat Pact

France Reported To Be Doing Her Part To Live Up To Agreement

France is doing her part to live up to the credit and letter of the wheat agreement, according to information reaching Hon. M. A. MacPherson, who represented the prairie provinces at the world wheat conference in London, last summer.

Samples of the literature broadcast over France have reached Mr. MacPherson. They include extremely large posters which urge the greater use of wheat and the limiting of the areas sown to wheat and particularly stress the importance of feeding wheat to livestock and poultry. Farmers are advised to mix one quarter wheat with each feed for a horse.

Prince Of Wales Sells Land

Proceeds To Go Toward Fund For Slum Clearance

Sale of 14 acres in Kensington, southwest London, belonging to the Prince of Wales' Duchy of Cornwall estates was announced in London, the proceeds to be devoted to slum clearance. The area borders the famous Oval, classic cricket-ground, which however is unaffected.

The "Duchy" has a policy of never selling and the gesture came from the Prince of Wales himself, without which the Kensington clearance plans would have been materially hindered.

Demand For Jersey Cows

Phenomenal growth in herds and in production of Jersey cattle and milk in Alberta during the past year, was reported to the annual meeting of the Southern Alberta Jersey Cattle Club by W. T. Hunter, Vernon, western field representative of the Canadian Jersey Cattle Club. He referred to a marked increase in demand for Jersey milk not only in western Canada but throughout the Dominion.

Important Medical Discovery

Miss Pearl L. Moorman, 34, a native of the Ozark country, was acclaimed by the medical world for her major part in developing palmar-esthesia, a method of quickly relieving a person from an unconscious state caused by an overdose of an anesthetic, thus, drowning, suffocation or acute alcoholism.

The man doesn't live who feels at ease in a room where two women are whispering.

W. N. U. 2090

Highway On Pacific Coast

Starting At Fairbanks Would End At Buenos Aires

Largest single highway project ever undertaken, the 12,000-mile international-Pacific Highway, is projected to begin at Fairbanks, Alaska, follow down the Pacific Coast to Valparaiso, and terminate at Buenos Aires.

Some sections already are completed. Others are passable. In Central America, most of the route has been surveyed.

From Mexico southward the route would be the same as the long-discussed Inter-American Highway. President Roosevelt has offered to finance the survey from Panama to Santiago, Chile, if the governments concerned agree, at a cost of probably \$500,000.

The tremendous undertaking of a Pacific road was conceived four years ago in Southern California. Since then, such men as Harry Chandler, powerful western publisher, and Peys Johnson of the National Automobile Chamber of Commerce have become identified with the plan. The Automobile club of Southern California has successfully scouted the route as far south as El Salvador, having sent four motor cars from Los Angeles.

Sponsors of the road do not urge an overnight spurge of primary highway construction from here to Cape Horn. But they have obtained pledges that the participating nations will lay out their road-building programs hereafter with a view to completing segments of the route as soon as possible.

Approximately 25 per cent. of the International Pacific Highway is an accomplished fact. The route from Hazelton, British Columbia, down the coast to San Diego and thence eastward to Nogales on the Mexican border, is a continuous stretch of 2,900 miles of primary highway.

Recipes For This Week

(By Betty Barclay)

TURNIP CROQUETTES

- 1 large yellow turnip.
 - 2 potatoes.
 - 2 egg yolks.
 - 1 teaspoon sugar.
 - Salt and pepper.
 - Crumbs and egg.
- Wash, peel and quarter the turnip. Cook until tender in boiling salted water to which has been added one teaspoon sugar. Press through a sieve. Peel and cook the potatoes separately. Mash until smooth. Combine three quarters of a cup of the cooked turnip with one-half cup of the mashed potato. Add the two slightly beaten egg yolks. Cool. Form into small croquettes. Dip in crumbs again. Fry in deep fat. Drain on brown paper.

YEAR-ROUND SALAD

- 1 package lemon or lime-flavored gelatin.
 - 1 pint boiling water.
 - 2 tablespoons vinegar.
 - 1 teaspoon salt.
 - 1 cup celery, finely cut.
 - 1 pimiento, finely cut.
 - 1 tablespoon green pepper, finely chopped.
 - 1/2 cup cabbage, finely shredded.
- Dissolve gelatin in boiling water. Add vinegar and salt. When slightly thickened, fold in remaining ingredients. Turn into individual molds. Chill until firm. Unmold. Garnish with mayonnaise. Serves 6.

Employing Hand Labor

Employers In Argentina Try To Give Work To Labor

Following the lead of a cigarette manufacturer who has just removed from his factory all cigarette-making machines in order to give work to several hundred unemployed men and women, working-men's leaders in Buenos Aires, Argentina, are trying to enlarge the idea. They are starting campaigns to induce plant owners in many other industries to substitute human for machine labor and thus give employment to thousands still idle.

Approved By King

The King has given his approval to regimental all-ances involving units in Canada, the United Kingdom and New Zealand. The Winnipeg Grenadiers have established an all-ance with the Scots Guards, while the Lincoln and Welland Regiment has allied itself with the Hawke Bay Regiment of the New Zealand forces.

Magistrate: "So you and your wife have been fighting again." Prisoner: "No, sir, the I told me this time."

NIGHT GOWN AND BED JACKET ENSEMBLE—A NEW AND DIFFERENT FASHION PARIS

SENT US

It's loveliness itself. The nightgown will wrap you in sheath-like slimmers. The ash slips through slashed opening at either side of the front, highlighting the gown, closely to the figure. It ties in snail effect at the back. It has the becoming "V" neckline and deep armholes.

The simple straight little jacket favours tripled founced sleeves. The original was pale blue crepe satin. A craft touch in strips of self-fabric stamped the French origin. It's easy to do. The pattern envelope explains everything about this interesting craft trim in detail.

Choose now! Make this exquisitely beautiful ensemble for just the cost of the fabric.

Style No. 411 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Size 36 requires 4 1/2 yards 39-inch and 10 1/2 yards trimming. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A Hardy Plant

Alfred Townsend, of St. Catharines, has produced a plant he calls the Eskimo plant and which he states bloomed out-of-doors immediately after sub-zero weather. The flower is white.

SOMETHING TO KEEP IN MIND.—Hanny, in the Ph. Ed. Inquirer.

Egg-Grading Regulations

New Schedule Came Into Effect The First Of January

The riddle of why does a chicken cross the road is not a whit more baffling to a great many people than the new federal egg-grading regulations which came into force on January 1. To those who take time out to study the act, however, it presents few difficulties. The terms "fresh specials," "fresh extras" and "fresh firsts" are to be discontinued. In future fresh eggs will be designed as "A," large; "A," medium, and "A," pullets. Eggs of more than 22 ounces to the dozen will be in the large category; the medium grade will weigh between 18 and 22 ounces, and pullets' eggs will weigh up to 18 ounces. The regulations put storage eggs in "B" grade, but patrons of Central market need not be concerned about that section of the act, because a city-by-law prohibits the vending of storage eggs on the public square.

Alfred Smee, manager of Central market, drew attention to the fact that interior quality was a main factor in the new grading schedule. There will be none to dispute that, except for throwing, a fresh little egg is much to be preferred to a big bad one. Superficial inspection of the exterior isn't helpful to egg shoppers, either. The customer must rely on the honesty of the purveyor, and the government, in its wisdom, gives egg dealers an especial incentive to be honest by providing stiff penalties for those who are not. For the purpose of the act, a fresh egg is one in which the air cell space does not exceed one-quarter of an inch. There is a continuous process of contraction within the shell and when candling reveals an egg to have more than this amount of air cell space, it is taken as prima facie evidence that the product is making ready to grow a beard.

Egg dealers with an established clientele will not be annoyed about the new regulations. They cannot afford to sell eggs of inferior grade and, for the protection of their business, would be careful to keep quality up even in the absence of official regulation.—Hamilton, Ont., Spectator.

Store Has "Gratis Day"

Customers In Medan, Dutch East Indies, Reap Benefit

Customers of two department stores in Medan, Dutch East Indies, may get a cash refund for goods purchased on a certain day, which is chosen by lot. Under the new plan all purchases made during the month are recorded on a cash slip, a copy of which is given to the customer. On the first day of the following month clips representing each day are deposited in a container, from which one is drawn represents the "gratis day," and those who made purchases on that day are given their money back.

Jasper Park Lodge

According to an announcement made by Walter Pratt, general manager of Canadian National Hotels, the opening and closing dates for Jasper Park Lodge this year will be June 15 to September 25. Of further interest to fishermen is the fact that Nipigon Lodge will be open from June 15 to September 15.

Once upon a time there was a wise husband who bought his wife such fine china that she wouldn't trust him to wash and dry the dishes.

Thirteen of the 615 members of the British parliament refuse to draw their salaries.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 3—MYOPIA, OR "SHORT-SIGHTEDNESS"

As explained in Article No. 4, to obtain normal vision, the depth of the eyeball and the curvature of the lens and Cornea should be in exact relation to each other.

Should the depth be too great or the lens or Cornea too convex then the focal point of the image will be in the Vitreous Humor in front of the Retina. The rays from the image looked at, after focusing will cross and proceed to the Retina forming an enlarged but blurred image. This is the Myopic condition, and unlike Hyperopia, nature does not provide any means of overcoming it.

The average Myope (Myopic person) has no trouble at the reading distance, his trouble being poor distant vision. It is significant that Myopic persons seldom indulge in outdoor sports or recreation but turn to books and study. The Germans are allowing even of this, especially among the "intellectuals" which may possibly account for their advancement in science. It is estimated that about 10 per cent. of the errors of the eye are six or seven per cent. of people are Myopic.

Myopia may be congenital or acquired. It may be acquired by excessive close work especially during childhood, before the eyeball has reached its maturity. True Myopia will never improve and all that can be hoped for is that by wearing

proper glasses early enough it will not increase and get into the "progressive" type with its resultant evils. It can always be corrected as soon as discovered, if for no other reason, to prevent further increase of the trouble. Excessive close work, especially if done under improper lighting conditions, is the principal cause of producing and increasing Myopia. Such people are usually intolerant of strong light. Being a "weak eye" such symptoms as easily tired and watery eyes often accompany this condition. Frowning or knitting the brows to obtain better vision is a very characteristic of Myopia.

As I said in explaining Hyperopia that it is the commonest cause of a child's eye turning in (crossed) so Myopia is the usual cause of the eye turning out. The great danger of allowing even a small amount of Myopia to go uncorrected is the almost certain probability that it will grow worse and become a progressive condition and from that it is only a step to the "malignant" type when the ruin of the Ocular system is usually a matter of time. If a normal depth eyeball of one inch were elongated, as in Myopia, one twenty-fifth of an inch, the vision would decrease from one hundred per cent to about fifteen per cent. (To Be Continued)

SUNDAY SCHOOL LESSON

JANUARY 21

JESUS BEGINS HIS MINISTRY

Golden Text: "Repent ye; for the Kingdom of Heaven is at hand." Matthew 4:17.

Lesson: Matthew 4:12-25.

Devotional Reading: Isaiah 61:1-6.

Explanations and Comments

Capernaum Becomes The Headquarters Of Jesus, verses 12-16.—Now when Jesus heard that John was dead, he remained and withdrew into Galilee. The Fourth Gospel narrates the earlier activities of Jesus in Judea, Chapters 1 to 3. From Judea he went first to Nazareth, but left that city (Luke 4:16-30 gives the reason) for Capernaum, which was on the borders of Galilee in the midst of a densely populated region. Matthew wrote his Gospel especially for the Jews, and he remained in Galilee to tell them that Jesus was in the borders of Zebulun and Naphtali, the two tribes who settled there in Old Testament times, and tells them that this was foretold by the saying of "Isaiah the prophet, verses 18 and 19. The people that sat in darkness in Galilee did, in truth, see a great light, for in Jesus was life, and the life was the light of men."

"When the gospel was first preached to the Saxons of Northumbria, by Paulinus (as we read in Bede's History), King Edwin sat in Council with his chiefs and wise men to consult whether they should give up their idols and believe in the Lord Jesus Christ One of the Councilors arose and spoke thus: "In winter, O King, when they are sitting in by hall at supper, with a great fire burning, and thy nobles and commanders around thee, thou canst a little bide, for he feels neither cold nor tempest; but it is short, and from the dark winter he vanishes into the dark wind of again. Such a life seems to me the short life of man; for we know not whence we came nor whither we go. If, therefore, this new doctrine can teach us anything certain, let us embrace it." And so Edwin and his people came out of the dark winter of heathenism into the glorious light of the gospel, and became Christians, and destroyed their idols; just as in our own day had been done in Madagascar, and in many of the South Sea Islands. So our Saviour's own preaching is described: "The people who sat in darkness saw a great light; and to them that sat in the region and shadow of death, them did light spring up."—W. E. Collins.

U.S. PLANES MAKE LONGEST MASS FLIGHT RECORDED

Honolulu.—The longest non-stop mass flight over water in aviation history was completed with clock-like precision here on Thursday as six United States navy planes, carrying 30 men on a swift 2,400-mile "routine" transfer from California to Hawaii, alighted at Pearl Harbour in 1-2-3 order.

The overall elapsed time of the planes in the air was 26 hours and 21 minutes, but the flying time in formation from the Golden Gate across the perilous stretch of the Pacific to Pearl Harbour was 24 hours and 45 minutes, official time.

They had their troubles with fog, deadweight and darkness. But they came through with certainty. It was not their first swift victory over distance.

A few months ago they flew in formation from Norfolk, Va., to Coco Solo, Panama, and thence to San Diego, Calif.

Some 600 miles off the Golden Gate the squadron dove into its first fog bank and the 10-P-5, commanded by Lieut. St. John Perry, of Greenville, S.C., became temporarily lost but rejoined the formation upon emerging from the hanging clouds. Four or five hundred miles farther out, Perry got lost again in the same manner, but again came back.

Would Fix Interest Rate

Manitoba Municipalities Recommend Plan Based On Wheat Price

Winnipeg, Man.—The executive of the Union of Manitoba Municipalities placed before the Manitoba government proposals for legislation to be introduced at the coming session of the Manitoba House. Among other things, the 29 resolutions called for an important change in the Debt Adjustment Act, which cited a new principle for dealing with interest on farm mortgages.

Adjustment of interest was proposed on the basis of the net track price per bushel of No. 1 Northern wheat at the close of the Winnipeg market September 15. The government was urged to amend the Debt Adjustment Act so that when wheat under such a classification was less than 50 cents, then interest for that year should be written off.

It was proposed that if the price be over 50 cents, but under 65 cents per bushel, interest should not be more than three per cent. If the price were between 65 and 75 cents the rate would be not more than four per cent. and if the price were 75 cents or over the rate should not be more than six per cent.

Outlook More Hopeful

Feeling in Europe Regarding Disarmament Talks Encouraging Turn

London, Eng.—The report Sir John Simon brought back from his conversations with Premier Mussolini at Rome has created a more hopeful outlook toward disarmament negotiations.

It was believed the report of the secretary for foreign affairs confirmed the view that diplomatic negotiations in the various European capitals, especially Paris and Berlin, were taking an encouraging turn, and that it was desirable that they be continued.

The Times editorially said "There can be no doubt that to break into Franco-German negotiations, which are making some progress, would far likelier hinder than help them."

Wins For Second Time

Edmonton, Alberta.—Championship for the best bird in the provincial poultry show here was awarded to a bronze turkey shown by Mrs. Frank Houcher, Czar, the bird that was best turkey at the recent Royal Winter Fair in Toronto. Reserve championship honors on the best bird in the show here went to Jack Brown, of Chilliwack, B.C., on his champion B.C. Rhode Island Red.

Prince To Visit South Africa

London, Eng.—Prince George has accepted an invitation to climb Table Mountain at Capetown with General Jan Smuts, he announced at a dinner in his honor. In connection with the forthcoming visit to South Africa, his royal highness said he anticipated an enjoyable instructive tour, with good food in the invigorating South African air.

Lifts Restrictions

United States Government Moves To Enlarge Supply Of Liquor

Washington.—Lifting the restrictions on importations of American type whiskey for 30 days, the United States government moved to enlarge the supply of liquor, lower prices and rout the bootlegger.

What effect the order might have on the Canadian liquor business with the United States was not readily ascertainable. As American type whiskeys have been flowing from Canadian distilleries into the republic outside of any quota restriction, the order was taken to refer to countries other than the Dominion with such right types of liquor.

Bread Control Law

Legislation Governing Selling Of Bread In Alberta To Be Introduced

Edmonton, Alberta.—Legislation to control the production and selling of bread in Alberta is likely to be introduced at the coming session of the legislature. Premier Brownlee and members of his government were asked by a delegation of master bakers for an act covering production, and price control will probably be adopted by the government on its own initiative.

That this province should have a Bread Act similar to those in Saskatchewan, British Columbia, and Ontario was the request put forward by the delegation.

Gold Seekers Stranded

Expedition Meets With River Accident In British Guiana

New York.—Associates of William La Varre, head of an expedition exploring the headwaters of the Essequibo River, deep in the jungles of British Guiana, were informed by cablegrams of a river accident which cost the explorers their 54-foot canoe and all their supplies.

The accident occurred in the Rupununi River, leaving the expedition isolated from civilization. La Varre indicated the expedition had discovered gold and diamond fields in a region that may prove to be one of the world's greatest sources of such treasure.

Russian Trade Agreement

Soviets Will Purchase Large Quantities Of French Products

Paris, France.—Soviet Russia agreed to buy \$15,000,000 worth of French products within the next year in a commercial agreement which was prepared for signature.

In exchange France is to grant Russia credit and a minimum tariff on Russian goods not competing with the French. In case competition threatens, this French will be free to impose quotas on such products.

France's exports to Russia are increased five-fold by the agreement as she exported less than \$3,500,000 worth of products to Russia in 1933.

Fair Pay For Teachers

Alberta Government To Take Action In The Matter

Edmonton, Alberta.—Action is proposed by the provincial government to ensure fair and equitable settlement of disputes between trustees boards and teachers. Premier Brownlee told a delegation from the Alberta section of the Canadian Labor Party.

The Premier stated that the Minister of Education and himself were working on a draft of legislation dealing with the formation of a board of reference and it was hoped that this would be acceptable to all sides.

New Brunswick Sells Bonds

St. John, N.B.—The province of New Brunswick has sold \$799,000 in 20-year 5 per cent. bonds, at 99.01, to a syndicate composed of the B.N.A. of Montreal, Royal Bank of Canada, A. E. Ames & Co. Ltd., Wood, Gundy & Co. Ltd., Eastern Securities, Ltd., and the Dominion Securities Corp. Ltd., according to an announcement made by Premier L. P. D. Tilley. The issue was made for the purpose of refunding debentures issued in 1924.

Find Headquarters Intact

Wellington, New Zealand.—Dr. Lincoln Ellsworth, leader of a proposed trans-Antarctic flight expedition, has arrived at the Bay of Wales, Antarctica, to find the Richard E. Byrd expedition headquarters established in 1930 intact. The report of his find was received here in a wireless message to the "Bear," supply ship of the recent Byrd expedition to the Antarctic.

Attains Ambition

Girl Who Worked In Harvest Fields Now Concert Artist

Toronto, Ont.—From a dishwasher in a restaurant to a highly paid concert artist is the story of Anka Meyerstrom's success. Anka became a full-fledged Canadian when she was granted naturalization papers and it was then revealed the hardships the young woman fought in western Canada to obtain her ambition.

In the west the young Swedish maid found herself in need of money. She donned men's clothing and worked in the harvest fields. Finally she reached Winnipeg in a box car and started her dishwashing career for a living.

She worked for a while on reaching Toronto in a hat and dress store, but she lost the job. Then on to Montreal to return to dishwashing.

One day at a party her voice attracted a concert manager. Now Anka is singing for a living.

Next Eclipse Of Sun

Partial Shadow Will Cover Half Of Pacific In February

Northfield, Minn.—An eclipse of the sun "which ends the day before it begins" will cross the Pacific next month and American astronomers officially appeal to stampisms to change courses and head into this temporary night in the interest of science.

The partial shadow will cover nearly half the ocean. Just before sunset it will shade the west coast of Canada and the United States.

ST. LAWRENCE PROJECT IS UP FOR DISCUSSION

Ottawa, Ont.—If the United States congress followed President Roosevelt's suggestion and ratified the St. Lawrence waterways scheme, the treaty would come before the Canadian parliament this session for similar action. The understanding has been that Canadian ratification would be withheld until Washington had dealt with the treaty.

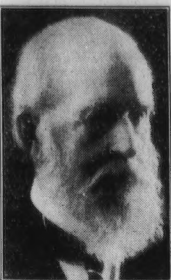

United States would bear most of the expenses of the international section, while Canada would bear the expenditures necessary in the Beauharnois and Lachine sections.

The international section would develop 2,000,000 horse power of electric energy, half going to each country. The Canadian half would be handed over to the province of Ontario which would bear part of the cost of the hydro development.

Toronto, Ont.—Opposition to the proposed St. Lawrence waterway appeared at the Great Lakes division action meeting of the National Association of Marine Engineers of Canada in convention here.

The proposed waterway was opposed "in its entirety" by the Great Lakes division which termed the belief Toronto some day would become an ocean port through construction of the waterway a "political dream."

CELEBRATES BIRTHDAY

Sir William Mulock, K.C.M.G., Chief Justice of Ontario, who celebrates his 80th birthday on January 19th.

Safety Of Missionaries

Reassurance Regarding Safety Of Americans In China Is Received

Hong Kong, China.—Some reassurance regarding the safety of six American missionaries trapped in the Fukien province fighting zone was contained in a report that Nationalist forces will not attack Foochow, the provincial capital and centre of an anti-Nationalist revolt.

The missionaries were isolated when the Nanking regulars and rebel forces engaged in fierce fighting near Kutien, about 50 miles from Foochow, and disrupted communication facilities made contact with them impossible during the last 11 days.

After a relentless offensive that reportedly brought them to within 25 miles of Foochow, the Nationalists were said to have abandoned the idea of bombing Foochow, hoping that the 19th route army in the capital would capitulate to avoid great property damage.

No Navy Building

Australia Has No Intention Of Embarking On Construction Program

London, Eng.—Australia, like Canada, has no intention of embarking on a program of new naval construction.

Rounding out a review of Empire naval policy, authoritative Australian sources in London, in response to enquiry by the Canadian Press, stated Australia had no intention of new naval building. They pointed out that at present she has only one sloop building, with no orders and no appropriations for any other vessels.

Few Industry Disputes

Regina, Sask.—Only eight industrial disputes occurred in Saskatchewan in 1932, states a report of the Department of Railways, Labor and Industries. They affected 365 employees and 27 employers. Total time was 4,191 man-work days. Trades involved were coal miners, printers, plumbers, and motion picture projectionists.

THRILLS AT THE CHRISTMAS CIRCUS AT THE OLYMPIA

Every Christmas thousands of Londoners flock to the Olympia to see the famous annual circus, and this year the circus again proved the most popular of the Yuletide entertainments in the British Capital. Our picture, taken during the performance, shows the Medrano Sisters in their wonderful equestrian act. This is their first appearance in England.

Continue Drive For Highway

Action On Road From The Pas Is Requested

The Pas, Man.—Continuing their drive for action on The Pas Highway connecting with the cities of the plains, civic organizations of The Pas and Cranberry Portage united to put their case before Premier John Bracken, of Manitoba.

The Pas Board of Trade wired Premier Bracken asking if the proposed road had been placed on the provincial programs set before the federal government for consideration in anticipated public works schemes to go into effect next spring.

Premier Bracken answered as follows:

"The Dominion Government has not requested us to submit a program of provincial works, nevertheless a program has been prepared of works suggested by various communities which list includes The Pas Highway among provincial works."

The members decided the premier's wire was ambiguous and drafted another asking whether or not The Pas Highway would be on the list sent to Ottawa. At the same time Cranberry Portage representatives sent similar wires.

Chicago Milk Strike

Government Move Terminates Struggle Of Farmers

Chicago.—The Chicago milk strike was ended as the United States government moved toward stern intervention against interference with interstate shipments and with the United States mails.

Settlement of the strike was in the form of a truce signed by representatives of the farmers, the big Chicago dairies, and even the independent dairies, which in the past have refused to guarantee any minimum price to producers.

Under the terms of the truce, a mediation board of three members, one from the distributors, one from the farmers, and a third to be selected by the first two, will be named to agree on a fair price to be paid farmers.

When the embargo ended there was not a drop of milk for sale in Chicago stores, even families with small children could obtain none, and deliveries to hospitals and institutions were threatened.

DEBT PROBLEM STANDING IN WAY OF RECOVERY

Ottawa, Ont.—Readjustment of international debt was an essential prelude to world economic stability, Hon. H. H. Stevens, Minister of Trade and Commerce, told the University Club here.

"But," the minister continued, "equally important is that the weight of international debts be lightened by the lowering of interest rates and by extending the term of payment. In some cases, actual forgiving of debt is necessary."

Canada's chief concern was how to secure for the farmer producer a fair return for his efforts. "We know he cannot pay his debt at present prices."

Mr. Stevens favored the remonetization of silver. "I hold the view that an international exchange based on currency with a metallic backing is the most secure; that is, a currency based on silver and gold. Such has been known and understood by all peoples of the world from time immemorial."

Speaking of lessons from the depression, one thing was clear and that was that problems which one, two, or three years ago were shrouded in mystery were today clearly discernible, if not yet actually solved, the trade minister said. "Where formerly there was only obscurity and fear, we now know what it is we have to face. What had been deemed 'terrible verities' economics have crumbled and fallen."

In the realm of finance, one after another the great nations of the world had abandoned the gold standard, he said.

What was to be done? One economist suggested a managed currency, another a commodity dollar, a third an international exchange based on the quantity of primary products, while others urged remonetization of silver. One man's opinion was as good as another. He held the view for remonetization of silver.

"We have also learned that the paradox of poverty amid plenty is not only possible, but terribly real," said Mr. Stevens.

FRENCH PREMIER FIGHTS CHARGES OF CORRUPTION

Paris, France.—Defending his regime from a barrage of corruption charges in the Chamber of Deputies, Premier Camille Chautemps revealed what he said was a plot against his government in connection with the \$40,000,000 Rayon Bank scandal.

While mobs rioted outside the Chamber, the premier revealed a coup d'etat which he said had been prepared three days ago to place the government in the hands of a directory of a few men "reputed for their energy."

In a fighting mood M. Chautemps told the Chamber that the Democratic regime was endangered when a resignation of the cabinet was envisaged following the death of Serge "Hindenburg" Alexievitch Staviaky and the collapse of his huge underground financial machine.

M. Chautemps said tracts were prepared demanding that France confide its destiny "to a directory of a few men reputed for their energy," adding, however, that these men had not been consulted about the matter.

Hundreds of Royalist youths, shouting "down with thieves and assassins," clashed with a police "autobus army" in the nearby Place de la Concorde as the popular indignation rose again to a high pitch.

Scores of demonstrators were held for questioning. A number were bruised by police clubs and the Royalists' freely-sung canes.

Several shots were fired into the air as determined Royalists, mostly students, fought stubbornly. They uprooted trees and iron tree guards along the boulevard and threw cafe chairs at police. Traffic was paralyzed.

Canada And World Peace

Dominion In Envious Position To Assist The Cause

Ottawa, Ont.—Six reasons why Canada has a special opportunity to contribute to the building of a peace world are listed in the discussion outline of the League of Nations Society's national peace study project, they are:

Canada is the only North American British country in the League of Nations; Canada is both an Atlantic and Pacific country.

Canada is both bi-lingual and bi-racial and her treatment of minority problems qualifies her to be of service to the rest of the world;

Canada is associated with six other countries in the British Commonwealth and in a position to influence them;

Canada lacks special interest in European questions and is for this reason sometimes qualified to act as conciliator;

Canada possesses great resources in nickel, copper, wheat, etc., which give her power to assist both in preserving world peace and in maintaining war.

The outline which has been prepared by a committee of experts in education proposes discussions for 10 meetings.

Dance Tunes Banned

Montreal, Que.—Eight of the latest dance tunes will not be heard over the air, at least from station CRRM in Montreal. Mr. Justice Frank Curran having granted an interim injunction to the Canadian Performing Rights Society against the Canadian Radio Broadcasting Commission, operators of the station.

Feed Grain Shortage

Sarnia, Ont.—Shortage of feed grain has become so acute in Lambton county, Ontario, that farmers fear they will have to draw from their seed grain reserves. Feed grain crops were poor last year and with most of the winter feeding still to come it is certain feed will have to be imported.

Wheat For Russia

Calgary, Alberta.—Ten thousand bushels of Garfield wheat, raised in the Olds district, have been shipped to Russia apparently for seed purposes, according to an announcement by the Alberta wheat pool. This was part of a total shipment of 16,000 bushels, which will be loaded out of New York during the present month.

Allow'd Entry

Washington.—Emma Goldman, deported to Russia in 1919 as an anarchist, and who was recently in Toronto, was given permission by the Labor Department to enter the United States for not longer than 90 days.

One Needed Reform

United States Government Bushing Billboards From Highways

It seems almost too good to be true, yet a dispatch from Washington says that the Federal Government at last is going to do something about billboards.

Wherever possible, the Public Works Administration is going to see that roads constructed with Federal money are built on 150-foot right-of-ways, so that trees and natural screening which exist may be kept and new screening may be planted where it does not exist. Driving along these roads of the future, our eyes will rest on cool, green foliage, scarlet dogwood, tall pines or eucalyptus and not someone's blaring bill for our money.

These wider right-of-ways will provide room for footpaths where pedestrians may walk in safety as well. Planted on either side, they will protect the road from soil erosion as well as sheltering it from heat and cold.

More fundamental reforms than these are lessing from Washington, but few which fill us with greater satisfaction.—Heina, Mont. Independent.

Quebec Program

Social And Labor Legislation To Come Before The House

A program of varied social and labor legislation was forecast and assurance given that there will be no new taxes in the speech from the throne delivered by Hon. H. G. Carroll, Lieutenant-Governor, at the opening of the third session of the 15th Quebec legislature.

Outstanding in the program were the following:

Creation of a system so municipalities may municipalize their electric power systems, if the taxpayers so desire; setting up of farms to give a new start in life to men coming out of prison; control over the price of milk in such a way as to improve the position of the farmer without increasing consumer prices; introduction of an insurance law seeking an end to the conflict; jurisdiction between the dominion and the provinces; protection of woodmen in the forest; control of electric rates; control of transportation by trucks.

Stories Of Early Days

Effort Made To Complete History Of Old Times In The West

Many fine stories of the early days in the west are being neglected. Those persons who might recall stirring instances of the "olden golden days" in Saskatchewan and Alberta are leaving the stage of life. The northern Alberta pioneers and Old Times' Association is, as a result, making arrangements to compile a history of the days when Edmonton was a struggling fur-trading fort, a village and then a thriving town.

"This year," the president said, "we should pick out the oldest resident in each district, the 'olden golden days' starting in Clover Bar, then into the Sturgeon and so on. All of the material obtained can be combined into a book. It's well worth our time and any expenditures necessary."

Feed And Fodder Relief

Saskatchewan Supplies Large Quantities For Rural Areas

Relief to the livestock population of Saskatchewan is being supplied in bushels of oats, 4,500,000 bushels of barley, 3,000 tons of fodder and 150,000 bushels of wheat, according to information given by C. B. Daniel, general manager of the Saskatchewan relief commission. In addition to this, there have been substantial transfers of feed and fodder made locally.

Mr. Daniel states also that the commission was making provision for a reasonable supply of feed and fodder to be on hand in the spring to make possible the expedient handling of the spring operations. No undue or startling reports of horses dying were evident, he said.

Many Executions

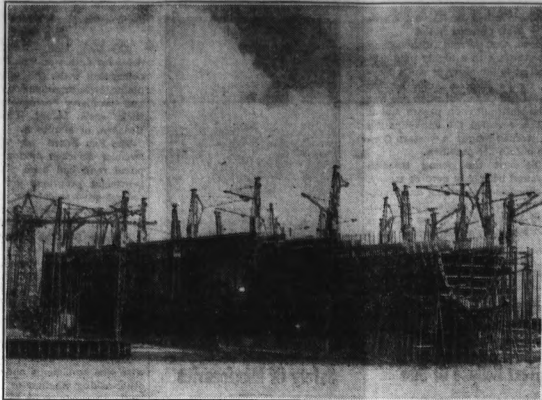

Fourteen Persons Put To Death In Afghanistan

Fourteen persons were executed in Afghanistan for alleged implication in a conspiracy resulting in the assassination of King Nadir Shah last November. Among those put to death were the father and two uncles of Abdul Khashi, a student who shot and stabbed the monarch; three of Khashi's nephews, and Ghulam Nabi, an army officer and assistant master of the school where Khashi studied. Khashi was executed in December.

Flash money is what you pay the street musician to go away.

W. N. U.—2029

BRITISH GOVERNMENT TO HELP BUILD GIANT LINER

Our picture, taken recently, shows the partly constructed liner, No. 534, at Clydebank, work upon which was suspended two years ago. The British Chancellor of the Exchequer has notified the House of Commons that he will shortly lay proposals before the Commons for furnishing aid for her completion. She will be one of the biggest ships afloat, being some 73,000 tons and 1,018 feet long. The Government also informed the House that aid is to be given the Mercantile Marine to meet the unfair competition of subsidized foreign ships.

"The Editor Regrets"

Method Of Rejecting Manuscripts Probably The Same In Dickens'

Time

Many people submit articles and "poems" to editors, often for no other reason than the hope of seeing their brain children in print, and in most cases the manuscripts are returned with a formal slip to the effect that "the editor regrets" the article is not suitable for the paper, or that there are too many of that kind in hand at present.

In Victorian times editors were more profuse in their regrets than they are now. Here is how, for instance, Charles Dickens, who was editor of Household Words, soothed the feeling of forty-two ladies and eleven gentlemen who sent him poems on the opening of the Exhibition in Hyde Park, London.

"The Conductor" of Household Words presents his compliments to the forty-two ladies who, during the week which ended on the 8th instant, were so good as to forward epic, didactic, dithyrambic, and lyrical poems, on the opening of the Great Exhibition in Hyde Park, and begs to assure them that a conscientious perusal of all their communications has produced a state of mind that leaves him quite unequal to the pleasure of answering their communications separately. The eleven gentlemen who have obliged him with copies of verses on the same subject will also, perhaps, accept this general acknowledgment of their poetic zeal. The result will, he fears, prove unsatisfactory to all parties; for, to the fatigue of perusal, he has now to add the pain of rejection. Not one of the fifty-three productions has been able to print with the faintest hope of gratifying his readers."

But what Mr. Dickens most likely said was: "Boy, carry this tripe out and dump it in the garbage can."—St. Thomas Times-Journal.

Housing Turkeys In Winter

Place Chosen Should Have No Concealed Space For Nests

Turkeys should be wintered where they are expected to lay in the spring. Housed during the winter months in such a place as a straw-barn, they have a very fine place to make their nests in concealed places, due to the wild instinct, and if some provision is not made to offset this habit, many of the eggs may be lost or destroyed by predatory animals. About the time when the wet muck is being commenced for the nook feed, suitable nests can easily be constructed with boards of one inch material, eight to twelve inches wide and three feet long, making a square frame.

Tread Like Camel's Foot

New Tire Invented For Cars Crossing Sahara Desert

An automobile tire with the tread of a camel's foot has been invented for use in the Sahara Desert. It puts the same weight per inch on the sand as does the foot of the "hump of the desert," having a nine-inch tread with an air pressure of only 12 pounds. Cars so equipped cross the desert at thirty-five miles an hour. In recent tests desert police were able to overtake five men who were smuggling drugs by camel.

London society has decided to ban midnight movie shows for charity.

Sets New High Record

Alberta's Butter Business Alone Shows Increased Value Of \$600,000

Nearly a million dollars more in value of production than in the preceding year is the record of the Alberta's dairy industry for 1933.

A preliminary estimate of the dairy branch of the Department of Agriculture at the end of the year gives 23,750,000 pounds of creamery butter as the approximate output of 96 creameries. This is some 300,000 pounds increase over 1932, and with a price of about one cent a pound better through the year the total value is put at \$12,725,000, a gain of \$600,000 in butter alone.

The butter business of Alberta, as represented in these figures made last year a new high record in the provinces. A large part of the production going to British Columbia markets.

Garnet Wheat

Carload Of Registered Seed Held At Edmonton

In storage at the government elevator in Edmonton is the only carload of Garnet wheat, from field inspected crops, in all Canada. What is more, it is, so far as is known, the only car lot of registered Garnet seed wheat in the world. The Alberta Department of Agriculture owns it and is holding it pending decision of the government as to what shall be done with it or what method of distribution shall be adopted.

Population Of Port Arthur

The population of Port Arthur in 1933, according to the assessment was 19,459, compared with 20,073 in 1923, but it is explained that in the months when the count was made last year many men were out in the bush cutting and peeling pulpwood, so that actually there was little or no change. Twenty-six nationalities are represented in addition to unknowns.

Animals In Elk Island National Park

According to a recent count of the animals in Elk Island National Park, Alberta, as reported to the Department of the Interior there are 1340 buffalo within this area; 473 elk; 298 moose, and 209 mule deer.

Intelligence And Humble Work

Wrong Opinions Held Regarding Social Values

Some fallacious ideas prevalent regarding the value of a high school education, the danger of nationalism in education and of other "sins" not so glaring were discussed by Miss C. I. Mackenzie, principal of the high school for girls, in an address before the women's guild of Christ Church Cathedral, Montreal.

As an example of a high school education not properly fitting a pupil to adjust herself to her environment, Miss Mackenzie cited the case of a girl who thinks and whose parents think that to be a stenographer and sit on a chair in a fine office is a step up in the world.

"Although she will be working a machine every bit as mechanically as her sister in a factory, yet she feels she will have reached a higher social standing by being on the office staff and to bridge this social gulf she goes to high school. She does not want any of the cultural offerings spread before her. When a depression comes her one skill is useless. She cannot sew, and to scrub she is ashamed."

"What we lack," said Miss Mackenzie, "is the young man or woman of the P.H.D. intelligence applied to plumbing or banking. The fact we are struck dumb with admiration at the perfection of the work done by a master-mind, whether it be scrubbing surgery or statecraft, shows how very few times we see the perfect marriage of the man to his job."

A Voluntary Prisoner

A wild partridge having discovered that it can obtain food without difficulty there has become a voluntary prisoner in the zoo at Charlottesburg, just outside Quebec. This is an exceptional case, according to the fish and game department of the Canadian National Railways, which points out that the partridge, being a very timid bird, generally shuns populated areas.

Man (to taxicab driver)—Here's five dollars. Go meet my mother-in-law at the train.

Driver—O.K. But suppose I miss her, or she doesn't come?

Man—Then I'll give you ten dollars.

One Of London's Landmarks

Radford's Famous "Sagar Shoppe" To Put Up Shutters

Ghosts of the gallants of 1700 who frequented "Radford's" will soon be left in the silent gloom with their memories when the shutters go up outside the famous old store.

Established in 1700, Radford's "sagar shoppe" quickly became the favorite haunt of the literary world because of its well chosen tobaccos and snuffs. Like its close neighbor, the renowned Cheshire Cheese, it has been one of Fleet Street's landmarks and one of London's oldest stores.

Everybody in newspaperland, editors, reporters, composers and newsboys, knows Radford's. Even now it still sells more snuff than almost any other house of its kind.

Tourists from the United States and other parts of the world visited "Ye Most Ancient Sagar Shoppe in Ye City of London" and sat upon the famous snuff-tub from which eminence Dr. Samuel Johnson propounded his philosophy.

On this same snuff-tub—if tradition be believed—Douglas Jerrold, Charles Dickens, Edmund Burke and George Augustus Sala reposed.

Now one of the ever increasing "closing" notices has gone up in the window and the stock is being sold out for the last time.

Fashionable tobacco stores selling much below usual prices have provided costly modern competition.

Radford's goes back to the days when signboards swung and creaked as the wind blew down through Temple Bar to Ludgate. Then the snuff and cigars were sold at the sign of the "Ship and Star," and today the original sign can still be seen hanging in the shop.

The building itself dates back to the year after the Great Fire of London—1667.

True Portraiture

Subject's Personality Is The Keynote Of The Whole Picture

Marion Long, who has been much feted since the news was announced of her election to the Royal Canadian Society of Artists, says: "A sense of the sitter's personality is the keynote of the whole picture, and even the color scheme of a portrait must symbolize the inner quality of the person. In painting a child, the color must express life and movement; but with an older person quietness is found in the soft-grey used for the hair or the ivory tint of the complexion."

The natural self-consciousness of a man or woman who posed for a picture might be overcome by conversation she explained. While chatting with the artist the sitter would assume a characteristic pose; his eyes would express interest and also his mouth; but when painting the latter, it was necessary for the artist to monopolize the conversation.

"Often I have talked fast for a whole morning," said Miss Long, "and I couldn't remember afterward one word I said." A new problem was found in each person painted, she concluded, but the great joy came when the self-imposed task was accomplished.

Future Of Handicrafts

Means Of Regaining Contented And Permanent Rural Life

Handicrafts stand as one of the greatest hopes for the Canadian farmer in the future, both economically and as a means of regaining a contented and permanent rural life. Col. Wilfrid Bovey, president of the Canadian handicrafts guild, told the Royal Empire Society at Montreal. Some of the finest tweeds to be found anywhere, he believed, were made by Canadian farmers. He urged the public, especially the urban public, to support this branch of the handicraft industry by purchasing Canadian tweeds in rural districts. The same held true, he said, of hooked rugs, Indian work, art metal work and wood-carving.

Indian handicraft and that done by "new Canadians," the Canadian-born sons and daughters of immigrants had taken on a new life due largely to the efforts of the Canadian handicrafts guild, Col. Bovey said.

Tortoise Still Living

Although Captain Cook died more than one hundred and fifty years ago, a tortoise which belonged to him is still alive and flourishing on the island of Tonga, where it enjoys the native rank of "Chief."

For the first ten months of this year 55,544,827 pounds of blanded beef were sold in Canada, an increase of 7,759,430 pounds on the 1932 corresponding period.

A Choice Of Evils

Life Of Average Farmer Is Never Very Easy

In his address to the Canadian Society of Technical Agriculturists at Ottawa, Sir E. John Russell, director of Rothamsted Experimental Station in England, said that even "with all the help of science and the kindly office of well-wishers, life can never be made entirely easy for the average farmer. He may be protected by quary laws tariffs and helped by scientific advice as much as you like, but he must always take risks. It is usually a choice of evils, and he has to decide between one or more courses of action, neither of which he would choose to take, but he has got to do it."

"The farmer's life is well illustrated by an incident I once met with in the west of England. There was a great Sagar Shoppe in a lady of seventy was going to marry a gentleman of seventy-one. But the matter was explained simply by one of her neighbors: 'The winter is coming on, and the peat has to be got in for fuel, and the potatoes have to be lifted and brought in; it was a case of either marrying a husband or buying a donkey.' Well, that is very much the farmer's situation. He is called upon to choose between two courses, neither of which is exactly what he would like to do. Our job as agricultural experts is to give him more alternatives, to try to make the various possibilities better for him, and the decision between them more easy."

The Most Useful Drug

Lord Dawson Thinks First Place Goes To Morphine

So far as I have observed no reviewer of Lord Riddell's Peace Conference diary has quoted a word to me of one of the most interesting conversations recorded there. Mr. Lloyd George suddenly asked Lord Dawson what drug he would choose if he were only allowed one out of the whole pharmacopoeia. His answer, "Morphine," seems surprising to the layman, for morphine, I take it, is a purely sedative and not a curative agent. But the first doctor on whom I tried the question said "Opium," which comes to the same thing. Well, suppose you could have three drugs, the Prime Minister pursued. Ah, said Lord Dawson, that would be more difficult; but taking a world-view he would not pursue the matter as to the third place he would bet between mercury, digitalis and arsenic.—London Spectator.

Heart Still In Work

Young Agriculturists Receive Wheat Samples From Herman Trelle

Herman Trelle, "The Wizard of Wembley" and king of all world's champion grain growers, may have been debarred from competing for another three times, title at Chicago this year, but he won that supreme honor three times in a row, but his heart is still warmly in the work of improving the strains of wheat and oats and other grains in Peace River. At a banquet, tendered by the Greater Prairie Producers of Trade to youthful agriculturists who are members of clubs for seed growers, calf and swine breeders, and alfalfa growers, Mr. Trelle presented to the junior club a dozen packages of type samples of wheat and oats and announced that he would supply samples to every member writing for them.

Performs Kindly Service

Toronto Woman Sends Savory Herbs To Home Makers In The North

A Toronto woman who lives near a market garden, which produces savory herbs, has been drying out and packing up small parcels to go to women in the north who can never get the real home-made flavor of marjoram and sage and summer-savory, but must rely on the occasional tin of herbs which comes their way and seems a luxury. "I felt it to be a pioneer mother," this philanthropist declared. "So they must have worked over their storing of herbs in old days."

"And so," said the magistrate recently, "this is the first person you have knocked down this year?"

"Pardon me," said the girl who lost, with dignity, "the fourth time they were the same person twice."

The governor of Craigville prison, of Aberdeen, Scotland, recently suggested that there would be a large church congregation if women were put under their minds not to marry a man unless he belonged to a church.

Perry's 1933 cotton crop brought twice as much money as that of 1932.

Local News

Mrs. J. M. Williams was a visitor in Calgary on Wednesday.
Mrs. Ward of Calgary is spending a few days in town visiting Mrs. Fox, Jr.

The annual meeting of the United Church will be held in the church on Monday, Jan. 29th.
R. M. McCool, M.L.A., is attending the U.F.A. Convention in Edmonton this week.

Percy Griffiths is spending his nights in the Fire Hall auditing the Village books.

Miss Stella Gordon returned on Friday after spending the week in Edmonton.

Mr. and Mrs. Bert Lilley entertained at a bridge party on Tuesday evening.

The weather continues mild to the delight of those who pay the coal bill.

Mrs. E. Cartwright returned from Calgary on Sunday after spending ten days with relatives.

Dad Hall is out gunning for the palooka who stole two of his hogs out of the U.F.A. feed lot.

Gudmund Johnson is in Calgary this week looking after his oil investments.

Licenses are reduced on automobiles and converted light delivery trucks made previous to 1928.

Mr. and Mrs. Ed. Fox entertained few friends at a dinner party on Friday last, the occasion being their thirtieth wedding anniversary.

W. A. Pryor of Saskatoon arrived here the first of the week to make the annual audit for the M. D. of Rosebud.

George McLeod was in Calgary on Saturday making arrangements for the orchestra at the Old Timers dance.

The Melody Boys Orchestra will furnish the music for the dance in East Community Hall tomorrow night (Friday).

Crossfield will be represented at the Calgary bonspiel this year for the first time in the history of the local club.

Mrs. T. M. Goldie underwent an operation at the Holy Cross Hospital Calgary on Monday and is doing as well as can be expected.

Dad Halliday was in the city on Wednesday identifying the goods stolen from his store last week and which were recovered by the City Police.

The staff of the local Bank of Commerce consists of three Scots men. Imagine trying to get a loan until payday with odds like that.

January 19th.

Is the date of the grand hop in East Community Hall. Good music and the usual good time.

Lake Parsons rounded up five curlers from around Dog Pound and came in for a friendly game on Saturday. Local players filled in and an enjoyable time was had.

The annual Burns' dinner will be held in the Beaverhall hall, Madden, on Friday, Jan. 26. Arrangements are being made for a real night's entertainment. Gent's 25c, ladies' 10c or 25c.

A surprise party was held at the home of Mr. and Mrs. Jas. Belshaw on Tuesday evening, on the occasion of Mr. Belshaw's birthday. The evening was spent playing bridge. Mr. and Mrs. Ballam annexed both prizes.

Stanley Reid celebrated his 35th birthday on Sunday last. Stanley is a young old timer, having resided in Crossfield for the past thirty-two years.

A meeting of the Crossfield and District Old Timers' Association will be held in the Chronicle office on Saturday afternoon, Jan. 20th, at 2 o'clock. Reports of committees will be received.

We understand that Gordon Purvis is taking a rink to the Calgary bonspiel which opens on Monday next. He will be assisted by Charlie Purvis, Tom Mair and Chas. Fox.

"Scotty" Lee former Crossfield baseball pitcher is now playing "amateur" hockey for Red Deer in the Big Four Hockey League. Scotty plays amateur hockey like he plays amateur baseball—providing he is well paid.

Doug Hall, D. W. Carmichael, "Doc" Nichol, Jim McCool and W. Miller motored to Olds on Saturday night to witness the Olds-Red Deer hockey game. It was a fast game which Olds won by a score of 8-2.

CURLING

Inter-Rink Competition (Royal Hotel Cup)

The following games have been played in this competition during the past week.

Meyers 11, Baker 10
Smart 11, McMillan 10 (13 ends)
J. Williams 16, McCaskill 11
McMillan 16, Baker 9
Meyers 13, J. Williams 3
McMillan 12, Becker 10
Smart 9, Becker 7
Purvis 13, McMillan 5

Three rinks of local curlers visited Didsbury on Wednesday night and played four friendly games, with the curlers of that town. Glen Williams won a game and lost a game, while skippers Mayor Williams and C. H. McMullins lost their games.

The rinks making their trip were: Ed. Clark, A. Whillans, Ed. Meyers, G. A. Williams, skip; George McCaskill, D. W. Carmichael, Ivor Lewis, J. M. Williams, skip; J. Dixon, G. Y. McLean, Dr. McClelland, C. H. McMillan, skip.

The Purvis rink won second in the consolation event at the Didsbury bonspiel which was finished up late on Saturday night. Gordon Purvis won both games in this event with last rock, which goes to prove that the games in the consolation—are just as close and interesting as the games played in the open events.

The rink—Gordon Purvis, skip, C. Becker, L. Overby and C. Fox.

The Ladies Aid of the United Church will hold a tea and sale of home cooking in the Chronicle office on Saturday afternoon of this week. Donations of cooking, etc. will be gratefully received.

Fred Stevens and Harry Kinney are down south of town looking after Mrs. Stones' place while she is visiting friends in the town and district and enjoying a well earned rest.

FORM "C"
The Domestic Animals Act (Municipalities)
Sale & Redemption of Impounded Animals (Sec. 48)

NOTICE is hereby given under section 48 of The Domestic Animals Act (Municipalities) that the following—1 Light Red Cow, no visible brand, 3 years old, right horn off, was impounded in the pound kept by H. Gano, located on the N. W. 21-28-3-W5M, on the 5th day of December A.D. 1933, and that the said animal was sold on the 27th day of December, 1933 to V. Brown of Crenna, Alta. and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the Municipality and to the purchasers of said animal.

For information apply to the undersigned.

G. B. HUNTER,
Secretary-Treasurer of the Municipal District of Beaver Dam, No. 281.
Post Office Dog Pound, Alta.

George: "What was Fenn doing out at that hour of the morning?"
Andy: "Wha, wha, he goes on parole every night."

The School Corner

(Edited by the School Reporter)

Opening of Parliament

Parliament opened in Room IV, Isabel Goldie and Frank Low were the candidates for Prime Minister. The election was held on Thursday and The Hon. F. R. Low won by a large majority.

On Friday morning the local M.L.A. Mr. R. M. McCool came to school and explained how parliament was opened and how it was carried on for the first two days.

The following officers were appointed: K. Fitzpatrick, speaker, G. Johnson, clerk, L. Sharp, sergeant-at-arms.

After the speech from the throne given by Mr. P. L. Johnston. The Hon. F. R. Low adjourned parliament until Thursday 18th at 11 a.m., when the budget will be brought down.

Dance a Success
The Crossfield High School wish to extend their thanks to all who helped to make their dance a success. The proceeds amounted to \$63.00. The funds are to be spent for social, literary and athletic activities.

Win Hockey Game
The Carstairs High School Hockey Team were defeated by the local High School Team by a score 1-0 at Crossfield on Saturday night.

L. Johnson got the local's tally during the second period. Accepting a smart pass from Heywood, Johnson made no mistake in beating S. Johnson, in the visitors net.

The features of the game were the heavy body checking and combination plays of both clubs. McFadyen excelled in the nets for the locals.

Line-up—Goal, Ralph McFadyen; defense, Ronnie McFadyen, Steve Nasadyk; forwards, Jimmie McClelland, Gordon Johnson, Stanley Pogue, Merle Heywood, Laverne Johnson, Albert Sharp.

The Crossfield Midgets, coached by D. W. Carmichael, put on a good display of hockey on Saturday afternoon to defeat the Airdrie Juveniles by a score of 1 to 0. The game was a real thriller from start to finish. Gavin Goldie was the bad boy of the game, being sent to the cooler no less than five times by referee Len Pullan.

Crossfield—Goal, J. Carmichael, defense, Gavin Goldie, Harold Mair; forwards, Jack and George Fleming, Albert and Lorne Sharp, Frank Murdoch, Jackie Williams.

Archie McFadyen has figured it out that a child residing north of town and attending the Crossfield school would have to travel 100 miles further during the year in the advent of the north crossing remaining closed.

NOTICE

Children up to the age of 12 years will be allowed to skate free of charge from 4 to 6 p.m. daily, except on Saturdays.
